

Odd and Interesting

Up to the time we entered the war, the largest national drive for raising money had been a pension

fund for clergymen, with \$4,000,000 as its objective. The emerald has replaced the ruby as the most precious stone in existence. The aggregate amount of money raised last year in various drives

is estimated to be more than \$1,000,000,000. The world's diamond industry is practically monopolized by the De Beers syndicate in South Africa. More than 95 per cent of the diamonds imported to the United

States come through the port of New York. Organizations, outside of local, that conducted drives for money last year amounted to \$24. This year's importation of cut and uncut diamonds is expected to

rise to the unprecedented value of \$100,000,000. The world production of genuine Oriental pearls has never reached a total value of \$10,000,000 a year at the source. In the last seven or eight years,

diamonds have risen 300 to 350 per cent in value. The great Kimberley diamond mine in South Africa is more than 4,000 feet deep. The repeating rifle was known and accepted in sporting circles as

early as 1840, but was not adopted by the United States army until 1884. The United States trained 15,000 air pilots during the war. The United States exports artificial silk products to China, Japan

and Italy, the chief silk producing countries of the world. The H. C. L. has hit upon the borders of Uganda and the Congo where the cost of a wife has risen from four spearheads in pre-war days to eight spearheads.

Mail and Telephone Orders

—from customers living outside the tri-cities will be given careful attention, but as many sale lots are limited and are apt to go quickly we cannot promise to fill all orders. If goods are on hand when orders are received they will be filled. To avoid disappointment we advise coming in person at earliest convenience. Mail or telephone orders from the tri-cities cannot be accepted on sale goods.
